

CLAIMS:

1. A system for displaying images, wherein
 - a mobile apparatus (14) is wirelessly connected to an image display apparatus (12),
 - the mobile apparatus (14) controls a reproduction unit (22) of the image display apparatus (12) in such a way that images are displayed by a display unit (24) of the image display apparatus (12), and
 - a representation of an image displayed by the display unit (24) is transmitted to the mobile apparatus (14) in which it is displayed by a display unit (18).
- 10 2. A system as claimed in claim 1, wherein
 - the reproduction unit (22) is provided for reproducing data in the form of a presentation comprising a plurality of consecutive images,
 - the mobile apparatus (14) predetermines the transition from one image to the next.
- 15 3. A system as claimed in any one of the preceding claims, wherein
 - the image display apparatus (12) is connected to a network (32, 16), and
 - the mobile apparatus (14) transmits an address of data within the network (32, 16) to the reproduction unit (22),
- 20 4. the reproduction unit (22) reads in the data via the network (16, 32).
5. A system as claimed in claim 3, wherein
 - the data are stored in the mobile apparatus (14) or in a further apparatus (34) connected to the network.
- 25 6. A system as claimed in any one of the preceding claims, wherein
 - the reproduction unit (22) is controlled in such a way that the images of a plurality of presentations are simultaneously displayed on top of each other and/or side by side.

6. A system as claimed in any one of the preceding claims, wherein
- the image display apparatus (12) is wire-connected to a network (32).

5 7. A system as claimed in any one of the preceding claims, wherein
- the mobile apparatus (14) at least comprises the display unit (18), a memory, a
central unit and input means (18, 20).

10 8. A system as claimed in any one of the preceding claims, wherein
- the display unit (24) comprises a device for projecting an image on a
projection face.

9. An image display apparatus for use in a system as claimed in any one of the
preceding claims, the apparatus comprising

15 - a reproduction unit (22) for processing presentation data and for generating
images therefrom, and

- a display unit (24) for displaying the images,

- a wireless interface (26) for inputting and outputting data,

wherein the image display apparatus is designed for a representation of an image displayed

20 by the display unit (24) is generated and outputted via the interface (26).

10. A method of displaying images, wherein

- a reproduction unit (22) of an image display apparatus (12) is controlled by a
mobile apparatus (14) in such a way that images are displayed by a display unit (24) of the
25 image display apparatus (12), and

- a representation of an image displayed by the display unit (24) is transmitted
from the image display apparatus (12) to the mobile apparatus (14) in which it is displayed by
a display unit (18).
